

## MACHINE OIL 40

General Purpose Lubricating Oil

The effectively designed for providing effective lubrication to the moving parts of the CNC and other modern multi tooling and multi spindle machines.

It is blended with the right formulation and proportions to provide lubrication and also to some extend rust prevention to the machine parts.

TEST PARAMETERS	SPECIFICATIONS
Appearance	Clear, Light Yellow
Flash Point	190 ± 5°C
Kinematic Viscosity @ 40°C	32 ± 3
Density @ 40°C	0.88 ± 0.02
Appearance	Clear, Light Yellow
